

SEO Guidelines for Writing Odoo Technical Blogs

1. Purpose

This SOP defines the standard process and guidelines for creating SEO-optimised technical blog content related to Odoo ERP.

The objective is to:

- Demonstrate technical expertise.
- Strengthen Infintor Solutions' authority as an Official Odoo Partner in India.
- Improve organic search visibility.

2. Keyword Research Procedure

2.1 Primary Keyword Selection

Each blog must target **one clearly defined primary keyword**.

The primary keyword must:

- Reflect high search intent.
- Be relevant to Odoo ERP services.
- Align with business objectives.

Examples:

- Odoo implementation in India
- Odoo 19 new features
- Odoo ERP for manufacturing
- Odoo customization services
- Odoo community vs enterprise

2.2 Supporting Keywords

Each blog must include 5–10 related supporting keywords that are:

- Contextually relevant
- Naturally integrated
- Not excessively repeated

Supporting keywords must enhance topical authority without keyword stuffing.

2.3 Search Intent Validation

Before drafting content:

1. Search the primary keyword on Google.
2. Analyze top-ranking pages.
3. Identify content format (example):
 - Guide
 - Comparison
 - Pricing analysis
 - Technical explanation
 - Listicle

4. Structure the article to match search intent.

Content must align with user expectations.

3. Content Structure Requirements

All blog articles must follow the standardized structure below.

3.1 SEO Title

- Maximum 60 characters.
- Must include the primary keyword.
- Must clearly indicate value or benefit.
- Avoid clickbait phrasing.

3.2 Meta Description

- 150–160 characters.
- Must include the primary keyword.
- Clearly describe the article's content and benefit.

3.3 Heading Hierarchy

Proper heading structure must be maintained:

- H1: Only one per article (must contain primary keyword)
- H2: Main sections
- H3: Subsections
- H4: Detailed technical breakdown (if necessary)

Example Structure:

H1: Odoo Implementation in India

H2: What is Odoo Implementation?

H2: Odoo Implementation Process

H3: Requirement Analysis

H3: System Design

H3: Customization

H3: Testing and Deployment

H2: Cost of Odoo Implementation

H2: Conclusion

Improper heading usage is not permitted.

4. Introduction Guidelines

The introduction must:

- Clearly define the business problem.
- Include the primary keyword within the first 100 words.
- Outline the scope of the article.
- Establish subject authority.

Length requirement: 150–200 words.

5. Technical Content Standards

All blogs must meet the following technical standards:

5.1 Technical Depth

Content must:

- Explain relevant Odoo modules (CRM, Sales, Inventory, Manufacturing, Accounting, HR, etc.).
- Describe workflows and processes.
- Include practical business use cases.
- Reference relevant Odoo versions (18, 19, etc.).
- Clearly differentiate Community vs Enterprise editions when applicable.

5.2 Accuracy Requirements

All technical information must be:

- Verified using official Odoo documentation.
- Version-specific where applicable.
- Updated to reflect current features.

Outdated or unverified information is not acceptable.

5.3 Prohibited Content

The following are not permitted:

- Copying content from the Odoo official website.
- Generic marketing statements without technical substance.
- Repetitive filler content.
- Keyword stuffing.

6. Content Length Standards

Recommended word count: 1800–2200 words

Pillar-level content: 2500+ words

Technical ERP topics require comprehensive coverage.

7. Keyword Optimization Requirements

The primary keyword must appear in:

- SEO Title
- H1
- First 100 words
- At least one H2 or H3
- Conclusion
- Naturally throughout the article (minimum 5–7 times)

Keywords must be integrated naturally without forced repetition.

8. Internal Linking Requirements

Each blog must include internal links to:

- Odoo Services page
- Official Odoo Partner in India page
- Minimum two related blog articles

Anchor text must be descriptive and relevant.

Generic anchor text such as “click here” is not permitted.

9. External Linking Standards

Each blog must include 1–2 high-authority external references when applicable:

- Odoo official documentation
- Odoo.com
- Reputable industry sources

External links must support technical credibility.

10. Writing Style and Tone

All blog content must adhere to the following style standards:

Tone:

- Professional
- Technical
- Authoritative
- Clear and structured

Writing Guidelines:

- Short paragraphs (2–4 lines)
- Logical section separation
- Use bullet points when appropriate
- Avoid overly complex sentences
- Minimize passive voice
- Avoid promotional exaggeration

Content must be understandable to:

- Business decision-makers
- ERP managers
- Technical professionals

11. Brand Positioning Guidelines

Infintor Solutions must be positioned as:

- An Official Odoo Partner in India
- An experienced Odoo implementation company
- A trusted ERP solution provider

Brand references must be:

- Contextual

- Informative
- Non-aggressive

Excessive promotional tone is not permitted.

12. Quality and Compliance Standards

Before publishing, ensure:

- Technical accuracy verified
- Version correctness confirmed
- Community vs Enterprise differentiation clarified
- Grammar and clarity reviewed
- Original content confirmed (no plagiarism)
- SEO structure properly implemented

Only content meeting these standards may proceed to publication.
